Profile

As a Software Development Engineer with over 3 years of experience, I have developed and maintained large-scale applications across a range of industries. I have a proven track record of successful software development, from conception and design to debugging and deployment. My skills include object-oriented programming, database design, software development, and software testing. In addition, I have extensive experience in developing software applications using modern technologies such as Java, C#, HTML/CSS, and JavaScript. I have a strong eye for detail, along with excellent problem-solving and critical thinking abilities. I am confident that my technical skills, experience, and drive will make me an asset to your team.

Employment History

Senior Software Development Engineer at Daikon Consulting, WY

Dec 2022 - Present

- Developed a web-based customer service portal for Daikon Consulting, WY that increased user satisfaction by 25% and reduced operational costs by \$50K.
- I implemented an automated system using ReactJS which streamlined the process of handling customer inquiries within 24 hours - reducing response time from 48 to 12 hours.
- Created an in-house mobile app with robust features such as real-time data analytics, GPS tracking capabilities and online payment options; resulting in 20% increase in overall client engagement across various departments at Daikon Consulting, WY.
- Designed a custom software solution integrating multiple databases into one common platform; allowing seamless communication between different teams leading to 40% improvement on project delivery timescales.

Software Development Engineer II at Big Sky Software, WY

Jul 2020 - Nov 2022

- Developed an automated system for Big Sky Software's customer support team, resulting in a 15% increase in productivity.
- Lead the development of a new product line that increased company revenue by \$2 million over six months and earned industry recognition from 'TechCrunch'.
- Created innovative software solutions to reduce costs associated with customer maintenance by 30%, saving the company more than \$500K annually.
