PROFILE

As a web developer with over 1 year of experience, I have designed and developed websites for a variety of clients using HTML, CSS, JavaScript, and PHP. I am adept at creating attractive and user-friendly websites that meet the client's needs. I have successfully managed projects from start to finish, ensuring that all deadlines are met and that the end product is of the highest quality. I am passionate about web development and continually strive to keep up to date with industry best practices. I am committed to producing websites that look great and function flawlessly.

EMPLOYMENT HISTORY

● Senior Web Developer at Synovus, GA

Sep 2022 - Present

- Developed a secure web application for Synovus that enabled customers to access their accounts online, resulting in an increase of 20% customer satisfaction ratings.
- Optimized the performance and scalability of existing applications with improved code structure, leading to reduced website loading time by 80%.
- Collaborated with marketing team on developing innovative digital solutions which resulted in boosting traffic from organic search sources by 50%.
- Implemented automated processes within web development cycle that decreased manual efforts up to 30%, thereby increasing efficiency.

● Web Developer at Cox Enterprises, GA

Jul 2022 - Jul 2022

- Developed and deployed a web application for Cox Enterprises that increased revenue by 25% in the first quarter of 2020: Utilized HTML, CSS, JavaScript to create an intuitive user interface. Deployment was completed within 2 months with no major bugs or issues reported post-launch.
- Implemented AJAX functionality on various websites owned by Cox Enterprises which improved page load times from 8 seconds to 3 seconds resulting in 20% increase in website traffic over 6 months period.
- Developed custom APIs using NodeJS and Express framework allowing seamless integration between back end services such as authentication service & payment processing gateways increasing customer satisfaction rate up to 80%.
- Actively monitored server performance metrics utilizing tools like New Relic; identified potential security threats before they caused any disruption leading towards 100% uptime for all hosted applications under supervision.
