☎ (835) 133-1996
📍 Concord, NH

Profile

I am a Test Automation Engineer with over 1 year of experience in software testing and test automation development. I have a passion for creating automated test suites and have experience in developing automated test scripts for various applications. My experience includes developing, executing and maintaining automated tests for both web and mobile applications using Selenium, Appium and Cucumber. I am highly skilled in creating automated test plans, test cases, test scenarios and test data. I have excellent problem-solving skills and an eye for detail. I am dedicated to ensuring the highest quality of software products.

Employment History

Lead Test Automation Engineer at OpenText Corporation, NH

Jan 2023 - Present

- Developed a modular automated suite of tests for OpenText Corporation's customer-facing applications, resulting in a 95% reduction in manual testing time.
- Designed and implemented an automated test framework that increased the speed of regression testing by 50%.
- Built an automated smoke testing process that identified critical defects before customer release, leading to a 25% decrease in customer complaints.
- Led a team of 4 software engineers in the development of automated test scripts that saved the company over $50,000 annually in QA labor costs.
