📍 1234 Palm Boulevard, Miami,
FL 33142

Education

Bachelor of Science in Civil Engineering at University of Florida, Gainesville, FL

Aug 2014 - May 2018

Relevant Coursework: Structural
Analysis, Geotechnics,
Transportation Engineering,
Fluid Mechanics, Environmental
Engineering, Construction
Management, Materials Science,
Surveying, and Engineering
Mathematics.

Profile

Civil Project Engineer with 5 years of experience in executing and managing infrastructure projects, including design, development, and construction. Proficient in AutoCAD, project management, and cost estimation, with a proven track record of delivering projects on time and within budget. Strong problem-solving skills, excellent communication abilities, and a focus on safety and compliance. Demonstrated success in collaborating with multidisciplinary teams to achieve project goals.

Employment History

Civil Project Engineer at Florida Engineering Group, FL

Feb 2023 - Present

- Successfully managed the design and construction of a \$15 million highway expansion project in Florida, resulting in a 20% improvement in traffic flow and a 10% reduction in travel time for commuters.
- Coordinated and supervised a team of 25 engineers and technicians in the delivery of a \$7 million stormwater management system, effectively reducing flooding incidents by 30% in the target area and significantly improving the water quality of local rivers.
- Developed and implemented innovative cost-saving measures for a \$10 million bridge rehabilitation project, leading to a 15% reduction in overall project costs without compromising structural integrity or safety standards.

Assistant Civil Project Engineer at Wantman Group Inc, FL

Jul 2018 - Jan 2023

- Successfully managed the design and construction of a \$5 million infrastructure project, leading to a 10% reduction in traffic congestion in a major Florida city.
- Coordinated with a team of engineers, architects, and contractors to complete a \$2.5 million stormwater management system upgrade, resulting in a 25% increase in flood control capacity for a vulnerable coastal community.
- Streamlined the permitting process for over 50 civil engineering projects, reducing the average approval time by 30% and saving clients an estimated \$1 million in project delays and costs.
