PROFILE

Dedicated Computer Systems Analyst with 1 year of experience in analyzing and optimizing technology systems to increase efficiency and productivity. Proficient in evaluating user requirements, designing tailored solutions, and collaborating with cross-functional teams. Demonstrates strong problem-solving, analytical, and communication skills, coupled with a keen attention to detail. Quick learner, committed to staying current with industry trends to drive continuous improvement and innovation.

EMPLOYMENT HISTORY

● Computer Systems Analyst at Cognizant Technology Solutions, MI

Mar 2023 - Present

- Led a team of 6 analysts in the successful migration of 1500+ client systems to a new cloud-based infrastructure, resulting in a 30% reduction in operational costs and a 25% increase in system efficiency.
- Developed and implemented data-driven performance optimization strategies for a large-scale enterprise application, leading to a 40% improvement in processing speed and a 20% reduction in server resource utilization.
- Designed and executed an innovative cybersecurity plan that increased overall security measures by 50% and reduced security incidents by 70%, earning recognition from company leadership and contributing to new business opportunities.

● Associate Computer Systems Analyst at General Motors, MI

Jul 2022 - Feb 2023

- Implemented a new system architecture that improved processing efficiency by 30%, resulting in reduced downtime and faster response times for internal teams at General Motors, MI.
- Developed and executed a comprehensive data migration plan for the transition from legacy systems to a modernized platform, successfully migrating 2 TB of critical data with minimal disruption to business operations.
- Collaborated on a cross-functional team to design and implement a new cybersecurity strategy, reducing system vulnerabilities by 25% and significantly enhancing overall security at General Motors, MI.
- Led the successful integration of three disparate IT systems following a major company acquisition, streamlining processes, and achieving a 20% reduction in annual IT maintenance costs.
