Blueprint interpretation

Structural assessment

Electrical inspection

Plumbing evaluation

HVAC analysis

Soil testing

Concrete examination

Employment History

Construction Inspector at Kadrmas, Lee & Jackson (KLJ), ND
Apr 2023 - Present

- Completed inspection of a \$50 million highway project in North Dakota, ensuring adherence to design specifications and compliance with state and federal regulations, resulting in the project being completed on time and within budget.
- Successfully managed a team of 6 inspectors for the construction of a 200-unit residential complex, overseeing every phase from site preparation to final walk-through, which led to a 98% occupancy rate within 3 months of completion.
- Identified and resolved over 100 discrepancies during the inspection of a 5-story commercial building, saving the client an estimated \$500,000 in potential rework and delays, and ensuring the building met all safety and code requirements.
- Developed and implemented a comprehensive training program for new construction inspectors at KLJ, resulting in a 30% decrease in errors and a 25% improvement in overall job performance among trainees.

Assistant Construction Inspector at Moore Engineering, Inc., ND
Sep 2021 - Feb 2023

- Successfully inspected and oversaw the completion of a \$5 million highway construction project, ensuring all safety and quality standards were met, leading to a 10% reduction in project completion time.
- Effectively managed a team of 5 junior inspectors, resulting in a 15% increase in inspection efficiency and a 20% decrease in inspection-related errors on a \$3 million commercial building project.
- Implemented a new inspection process that led to a 25% reduction in rework costs and increased overall project profitability by 8% on a \$2 million residential development project.

Certificates

International Code Council (ICC) Certification
Mar 2022
