

# Sunidhi Lindborg

CRNA

## Profile

Certified Registered Nurse Anesthetist (CRNA) with 5 years of experience in delivering safe and effective anesthesia care to diverse patient populations. Proficient in various anesthesia techniques and skilled in collaborating with surgical teams to optimize patient outcomes. Demonstrated ability to manage complex cases, respond calmly to emergencies, and make informed decisions. Committed to maintaining current knowledge of best practices and contributing to a positive healthcare environment.

## Employment History

### Certified Registered Nurse Anesthetist (CRNA) at Kona Anesthesia Group, HI

May 2023 - Present

- Successfully administered anesthesia to over 1,500 patients per year, maintaining a 99% satisfaction rate and zero incidents of adverse reactions due to thorough pre-operative assessments and diligent monitoring during surgery.
- Significantly reduced the average recovery time for post-surgical patients by 20%, through the implementation of an Enhanced Recovery After Surgery (ERAS) protocol and close collaboration with the surgical team.
- Conducted monthly training sessions on anesthesia best practices for 25 nursing staff members, resulting in a 15% decrease in anesthesia-related complications and improved patient outcomes.
- Streamlined the scheduling process for anesthesia coverage, leading to a 30% reduction in overtime costs and increased efficiency in the allocation of CRNA resources.

### Staff CRNA at Hawaii Anesthesia Services, HI

Aug 2018 - Mar 2023

- Successfully managed anesthesia administration for over 1,500 surgical procedures annually, ensuring patient safety and comfort while maintaining a 99% success rate in preventing complications related to anesthesia.
- Spearheaded the implementation of a Continuous Quality Improvement (CQI) program within the anesthesia department, resulting in a 20% reduction in medication errors and a 15% improvement in overall patient satisfaction scores.
- Collaborated with a multidisciplinary team to develop and implement Enhanced Recovery After Surgery (ERAS) protocols, leading to a 25% decrease in average hospital stay length and a 30% reduction in postoperative complications for surgical patients.
