

PROFILE

I am an experienced Order Picker with over 1 year of experience in a fast-paced warehouse environment. I have great attention to detail and an excellent work ethic. I am proficient in using RF scanning technology and I am well-versed in warehouse protocols. I am also comfortable with meeting deadlines and working in a team environment. I have a solid understanding of safety regulations and an ability to lift heavy items up to 50 lbs. My experience has also given me the ability to work quickly and accurately, ensuring that orders are fulfilled in a timely manner.

EMPLOYMENT HISTORY

Order Picker II at Big Joes Material Handling, AK

Feb 2023 - Present

- Increased order accuracy rate by 10% within 3 months: As an Order Picker II at Big Joe's Material Handling, AK, I was able to increase the order accuracy rate from 90% to 100% within 3 months. This was achieved by implementing a comprehensive quality assurance system and double-checking orders prior to shipment.
- Reduced inventory shrinkage by 25%: By utilizing a more efficient inventory management system, I was able to reduce the amount of inventory shrinkage from 5% to 0.5%. This resulted in a 25% reduction in inventory losses for the company.
- Improved order processing time by 20%: I was able to improve the order processing time from 7 days to 5.5 days by introducing a new software system to streamline the ordering process. This resulted in a 20% improvement in order processing time.

Order Picker I at Alaska Material Handling, AK

Jul 2022 - Jan 2023

- Increased warehouse efficiency by 22% by reorganizing the order picking system. By implementing a new labeling system, I was able to cut down on mis-picks and reduce order picking time by 25%.
- Developed an automated system for order picking that eliminated manual entry errors, resulting in a 20% reduction in order picking time and improved accuracy of orders.
- Streamlined order picking processes by introducing new technologies, reducing order picking errors by 15%. This resulted in an increase in customer satisfaction and an overall boost in productivity.
