123 Oak Street, Charlotte, NC 28202

Detail-oriented Drafting Technician with 1 year of experience in creating high-quality technical drawings and plans. Proficient in AutoCAD and Revit, with a strong foundation in architectural and engineering principles. Adept at collaborating with team members, ensuring accuracy and timely completion of projects. Committed to continuous learning and skill development in the drafting and design field.

Drafting Technician at Cree, Inc., NC

Apr 2023 - Present

- Successfully completed over 150 drafting projects within a year, with a 98% on-time delivery rate, significantly contributing to the timely execution of engineering and construction plans at Cree, Inc., NC.
- Streamlined the drafting process by implementing an improved layering and labeling system in CAD software, resulting in a 20% reduction in drafting time and increased efficiency in project completion.
- Trained and mentored five new Drafting Technicians, enabling them
 to efficiently integrate into the team and contribute to the successful
 completion of various projects within their first three months on the
 job.
- Collaborated closely with engineers and project managers to optimize designs and reduce material costs by 15%, saving the company an estimated \$500,000 on construction projects during a two-year period.

Junior Drafting Technician at McKim & Creed, NC

Jul 2022 - Mar 2023

- Successfully completed over 150 drafting projects within the first year of employment, consistently meeting deadlines and maintaining high quality standards.
- Reduced drafting errors by 30% through the implementation of a new quality control process, resulting in increased efficiency and reduced project timelines.
- Collaborated with a team of engineers and technicians to develop and implement a comprehensive training program for new hires, reducing onboarding time by 40%.
- Actively contributed to the successful completion of a major infrastructure project, assisting in the creation of detailed technical drawings and plans, which led to a 10% increase in overall project efficiency.
