## PROFILE

EHS Specialist with 2 years of experience in implementing and maintaining effective Environment, Health, and Safety programs across various industries. Proficient in conducting risk assessments, developing training materials, and ensuring compliance with relevant regulations. Demonstrated ability to collaborate with cross-functional teams and drive continuous improvement in workplace safety and environmental performance. Strong analytical and problem-solving skills, with a commitment to fostering a culture of safety and sustainability.

## EMPLOYMENT HISTORY

### ● EHS Specialist at AECOM, PA

Apr 2023 - Present

- Successfully reduced workplace accidents by 35% within the first year by implementing comprehensive safety training programs and proactive risk assessments for AECOM's Pennsylvania operations.
- Streamlined compliance processes, resulting in a 25% reduction in regulatory violations and fines, by developing and maintaining an efficient environmental management system that tracked permits, inspections, and reporting requirements.
- Conducted over 100 site audits and inspections, identifying and mitigating potential hazards, which led to a 40% improvement in overall site safety performance and increased employee awareness of EHS best practices.
- Spearheaded a waste reduction initiative that led to a 30% decrease in hazardous waste generation and disposal costs, through the implementation of waste minimization strategies and employee training on proper handling and disposal procedures.

### ● EHS Coordinator at Golder Associates, PA

Aug 2021 - Feb 2023

- Successfully reduced workplace accidents by 40% within two years by implementing comprehensive safety training programs and fostering a strong safety culture among employees.
- Conducted over 150 thorough site inspections and audits per year, ensuring compliance with local, state, and federal regulations, resulting in zero fines or penalties for the company.
- Achieved a 95% compliance rate with environmental permit requirements by streamlining reporting processes and maintaining close communication with regulatory agencies.
- Developed and implemented an effective hazardous waste management program, reducing disposal costs by 25% and minimizing environmental impact.
