

# Sheretta Hilaire

Environmental Consultant

## Profile

Dedicated Environmental Consultant with 1 year of experience in analyzing and providing sustainable solutions for environmental issues. Proficient in conducting environmental assessments, evaluating regulatory compliance, and developing strategies to minimize environmental impact. Adept at collaborating with cross-functional teams and communicating effectively with diverse stakeholders. Committed to fostering environmentally responsible practices and driving continuous improvement.

## Employment History

### Senior Environmental Consultant at Tetra Tech, OK

May 2023 - Present

- Successfully managed a large-scale site remediation project, resulting in the removal of over 5,000 tons of contaminated soil and the restoration of the site to regulatory standards, saving the client \$1.2 million in potential fines and penalties.
- Conducted a comprehensive environmental impact assessment for a major infrastructure project, leading a team of 10 consultants to analyze potential ecological, social, and economic impacts, and ultimately securing project approval from regulatory agencies.
- Developed and implemented a company-wide sustainability strategy for Tetra Tech, reducing energy consumption by 15% and water usage by 10% within two years, saving the company over \$500,000 in operating costs.
- Spearheaded a successful stakeholder engagement program for a controversial resource extraction project, effectively addressing community concerns and securing vital support from local government and community leaders, enabling the project to proceed on schedule and within budget.

### Environmental Consultant at SCS Engineers, OK

Sep 2022 - Mar 2023

- Successfully managed a large-scale brownfield remediation project for a major client, resulting in a 95% reduction in soil and groundwater contamination levels and securing over \$2 million in government grants for site redevelopment.
- Conducted comprehensive environmental assessments for over 50 commercial and industrial properties, identifying potential risks and liabilities, and providing clients with actionable recommendations to mitigate environmental impacts, saving an estimated \$5 million in potential fines and remediation costs.
- Led a team of consultants in developing and implementing a customized stormwater management plan for a 100-acre industrial facility, reducing the risk of non-compliance with regulatory requirements by 90% and preventing an estimated \$1 million in potential damage from flooding and erosion.
