PROFILE

Family Nurse Practitioner with 2 years of experience providing compassionate and comprehensive care to patients across the lifespan. Proficient in assessing, diagnosing, and managing acute and chronic health conditions. Skilled in patient education, health promotion, and preventive care. Demonstrates strong collaboration and communication abilities, fostering positive relationships with multidisciplinary healthcare teams. Committed to delivering high-quality, evidence-based, and patient-centered care.

EMPLOYMENT HISTORY

- Family Nurse Practitioner at Palmetto Health-USC Medical Group, SC**
May 2023 - Present
 - Successfully managed a caseload of over 120 patients per month, providing comprehensive care to individuals and families at Palmetto Health-USC Medical Group, SC.
 - Implemented a new patient education program that resulted in a 25% increase in patient satisfaction scores and a 30% improvement in medication adherence within the first six months of launch.
 - Collaborated with an interdisciplinary team to develop and execute a community outreach initiative targeting underserved populations, resulting in a 20% increase in access to primary care services for these communities.
- Nurse Practitioner at Bon Secours St. Francis Health System, SC**
Jul 2021 - Apr 2023
 - Successfully managed the care of over 1,500 patients annually, ensuring accurate diagnosis and effective treatment plans while maintaining a 95% patient satisfaction rate.
 - Streamlined the workflow in the outpatient clinic by implementing a new electronic health record system, resulting in a 30% reduction in paperwork and an increase in overall efficiency.
 - Collaborated with an interdisciplinary team to develop and implement a comprehensive diabetes management program, which led to a 20% reduction in hospital readmissions for diabetic patients within one year.
 - Spearheaded a community outreach initiative to provide free health screenings and vaccinations, reaching over 2,000 underserved individuals in the local area and contributing to a 10% decrease in preventable illnesses.
