Dalia Gladstone

Cloud DevOps Engineer

👤 Profile

I am an experienced Cloud DevOps Engineer with over 2 years of experience in developing, deploying and managing cloud-based software solutions. I have a strong background in cloud architecture, automation scripting and Linux/Unix system administration. My expertise includes creating and managing AWS cloud infrastructures, designing and developing CI/CD pipelines, and developing automation tools and scripts. I also have experience in deploying and managing applications on cloud platforms, setting up monitoring and logging tools, and performing security audits. I have an excellent understanding of DevOps best practices and I am comfortable working with different teams across the organization.
