PROFILE

I am a Solutions Architect with over 3 years of experience in designing, developing and maintaining high-performance, cost-effective, and secure software solutions for clients. My expertise lies in integrating cutting-edge technologies to create innovative and reliable applications. I have a proven track record of successful projects and have worked with a variety of clients in various industries. I have strong knowledge of cloud platforms, including AWS, Azure, Google Cloud Platform, and OpenStack, and I am proficient in many programming languages, such as Java, Python, and JavaScript. In addition, I have a deep understanding of DevOps principles and processes, and I am skilled at using automation tools such as Chef, Puppet, and Ansible. My goal is to continue to develop successful and innovative software solutions that exceed my clients' expectations.

EMPLOYMENT HISTORY

Solutions Architect at Accenture, OH

Dec 2022 - Present

- Developed a cloud-based architecture for Accenture's Ohio office that reduced hosting costs by 20% and improved scalability.
- I worked closely with stakeholders to develop the optimal solution, taking into account cost savings, security requirements and performance objectives. The new system was implemented within 8 weeks of project inception without any disruption in service to staff or customers.
- Led an initiative which resulted in successful migration from legacy systems to modern SaaS solutions across multiple locations at Accenture's Ohio offices; reducing operational overhead by 15%. I managed all aspects of the transition process including vendor selection, budget management and stakeholder coordination while ensuring minimal downtime during implementation period - ultimately resulting in increased efficiency gains throughout organization operations as well as customer satisfaction levels due to enhanced user experience overall.
- Spearheaded enterprise wide adoption & integration of DevOps practices/toolsets across entire development team at Accenture OH location – increasing productivity levels up 30%, along with significant reduction (15%) on time spent debugging code prior deployment cycles.

Senior Solutions Architect at Deloitte Consulting LLP, OH

Jul 2020 - Oct 2022

- Developed a cloud-based architecture for Deloitte that reduced server costs by 50%, resulting in an annual savings of $250,000.
- Implemented the DevOps pipeline model which streamlined software development processes and improved delivery times by 60%. This resulted in increased customer satisfaction ratings from clients.
- Led a team to design and implement an enterprise data warehouse solution that enabled real time analytics capabilities with accuracy levels over 98%. The project was completed on budget within 6 months.
