Employment History

Information Security Specialist at Arctic IT, AK

Apr 2023 - Present

- Implemented a comprehensive security framework for Arctic IT, resulting in a 50% reduction in security incidents within the first year of implementation.
- Conducted regular penetration testing and vulnerability assessments, identifying and addressing over 100 critical vulnerabilities within a span of six months, significantly improving the organization's security posture.
- Led a team of five security analysts in monitoring and responding to security threats, achieving a 75% reduction in average incident response time from 24 hours to 6 hours.
- Developed and delivered cybersecurity training programs for over 200 employees, increasing overall staff awareness and contributing to a 30% decrease in phishing attack success rates.

Junior Information Security Specialist at Sisua Digital, AK

Sep 2021 - Mar 2023

- Successfully implemented a company-wide cybersecurity training program, resulting in a 30% reduction in security incidents within the first six months.
- Conducted comprehensive vulnerability assessments on over 50 critical systems, identifying and remedying 200+ potential security risks, improving overall system security by 40%.
- Played a key role in developing and executing an incident response plan, reducing average response time to security breaches by 50% and minimizing potential damage to company assets.
- Collaborated with cross-functional teams to design and implement a secure network architecture for a major client, ensuring compliance with industry best practices and reducing the risk of data breaches by 70%.
