PROFILE

Results-driven Information Systems Analyst with 2 years of experience in analyzing and optimizing business processes through innovative technology solutions. Adept at implementing data-driven strategies, managing IT projects, and improving system efficiency. Proven ability to collaborate effectively with cross-functional teams and deliver high-quality results in fast-paced environments. Strong analytical, problem-solving, and communication skills contribute to consistent success in meeting organizational goals.

EMPLOYMENT HISTORY

Information Systems Analyst at SAS Institute Inc., NC

May 2023 - Present

- Developed and implemented an innovative data management solution that streamlined data processing, resulting in a 25% reduction in operational costs and a 15% increase in overall efficiency for the company.
- Successfully led a team of 5 analysts in a major systems migration project, consolidating multiple legacy systems into a unified platform, which increased system reliability by 30% and reduced maintenance costs by 20%.
- Designed and executed a comprehensive cybersecurity strategy that significantly improved the company's security posture, resulting in a 50% decrease in security incidents and a 40% reduction in average incident response time.

Junior Information Systems Analyst at IBM, NC

Jul 2021 - Apr 2023

- Successfully implemented a new data management system for a major client, resulting in a 25% reduction in processing time and saving the client $1.5 million annually.
- Conducted a thorough cybersecurity assessment for a large financial institution, identifying and mitigating potential vulnerabilities, which led to a 40% decrease in security incidents over a one-year period.
- Streamlined internal IT processes for IBM NC by automating 30% of routine tasks, leading to a 20% increase in overall team efficiency and reducing operational costs by $500,000 per year.
