HOBBIES

PROFILE

A highly skilled Land Surveyor with 4 years of experience in conducting precise measurements and mapping of land boundaries, topography, and features. Proficient in utilizing advanced surveying equipment and software, ensuring accurate and efficient data collection. Adept at collaborating with cross-functional teams, managing multiple projects, and adhering to regulatory requirements. Demonstrated ability to deliver high-quality results, maintain strong attention to detail, and provide excellent client service.

EMPLOYMENT HISTORY

Land Surveyor at Laramie Land Surveying, WY

May 2023 - Present

- Successfully completed a large-scale surveying project for a 500-acre residential development in Laramie, WY, which involved coordinating with multiple stakeholders and delivering accurate boundary, topographic, and utility mapping within a tight deadline of 6 months.
- Managed and executed a comprehensive ALTA/NSPS Land Title Survey for a 100,000-square-foot commercial property, resulting in the identification and resolution of several critical encroachments and easement issues, ultimately saving the client an estimated \$250,000 in potential legal disputes and construction delays.
- Led a team of surveyors in the implementation of advanced technology, including GPS and robotic total stations, to increase efficiency and accuracy on a two-year highway expansion project spanning over 30 miles, resulting in a 20% reduction in fieldwork hours and a 15% improvement in overall data accuracy.

Assistant Land Surveyor at Wyoming Surveying Services, WY

Jul 2019 - Apr 2023

- Successfully completed a survey of over 500 acres of land in the Jackson area within a tight deadline of one month, resulting in an efficient and accurate subdivision plan for a major real estate developer.
- Led a team of four junior surveyors in conducting a comprehensive boundary survey for a 300-mile pipeline project in Wyoming, ensuring all regulatory requirements were met and significantly reducing potential legal disputes for the client.
- Streamlined the data collection process by implementing advanced GPS technology, ultimately increasing the team's productivity by 25% and reducing fieldwork time by two weeks on a large-scale project.
- Played a key role in securing a \$1.5 million contract with a major energy company by providing accurate and timely topographic surveys, demonstrating the company's expertise and commitment to high-quality service.
