

Damber Comley

Landscape Architect

Profile

A highly skilled Landscape Architect with 5 years of experience in designing, planning, and implementing innovative landscape solutions for various projects. Proficient in employing sustainable practices, collaborating with multi-disciplinary teams, and utilizing cutting-edge design software to create visually appealing and functional outdoor spaces. Adept at managing project timelines, budgets, and stakeholder expectations, while consistently delivering high-quality results and fostering client satisfaction.

Employment History

Landscape Architect at Studio 1619 Landscape Architecture, FL

May 2023 - Present

- Successfully led the design and implementation of a 5-acre sustainable public park project in Orlando, resulting in a 30% increase in green space for the community and earning the firm a prestigious ASLA award for excellence in environmental design.
- Managed a team of 10 professionals in the revitalization of a 3-mile stretch of urban waterfront in Miami, transforming a neglected area into a vibrant, accessible space with mixed-use development, increasing foot traffic by 50% and boosting local business revenue.
- Developed innovative stormwater management strategies for a large-scale residential development in Tampa, reducing on-site runoff by 35% and contributing to the project's LEED certification, setting a new benchmark for sustainable design in the region.

Associate Landscape Architect at EDSA, Inc., FL

Jul 2018 - Apr 2023

- Led the design and implementation of a 50-acre sustainable urban park in Miami, resulting in a 30% increase in local green space and a LEED Gold certification for the project.
- Managed a team of 10 professionals to successfully complete a \$5 million waterfront revitalization project in Fort Lauderdale, FL, on time and within budget, leading to a 20% increase in public usage and a 15% increase in surrounding property values.
- Developed and executed innovative stormwater management strategies for a 100-acre mixed-use development in Tampa, FL, reducing runoff by 40% and saving the client an estimated \$1 million in infrastructure costs.
