## PROFILE

Dedicated Transportation Planner with 1 year of experience in designing and implementing efficient transportation systems and infrastructure solutions. Proficient in data analysis, traffic simulation, and project management, with a strong commitment to sustainable development and community engagement. Demonstrates excellent problem-solving and communication skills, consistently delivering high-quality results to meet project objectives.

## EMPLOYMENT HISTORY

### ● Transportation Planner at Sam Schwartz Transportation Consultants, NY

Jan 2023 - Present

- Implemented a comprehensive traffic management plan for a major city event, resulting in a 20% reduction in congestion and a 15% increase in public transportation usage, leading to improved mobility and reduced travel times for over 500,000 attendees.
- Developed and executed a successful bike-sharing program that increased bicycle commuting by 25% within the first year, contributing to a 10% decrease in vehicle miles traveled and reducing greenhouse gas emissions by 5,000 metric tons annually.
- Conducted a thorough analysis of transit system performance, leading to the optimization of bus routes and schedules, which increased ridership by 12% and reduced operating costs by 8%, saving the agency \$1.2 million annually.

### ● Associate Transportation Planner at AECOM, NY

Jul 2022 - Nov 2022

- Successfully reduced traffic congestion by 15% in a major New York City area through the implementation of an innovative transportation plan, which included optimizing traffic signal timings and improving public transit accessibility.
- Managed a \$3 million budget for a multi-modal transportation project that increased the efficiency of the city's public transit system, resulting in a 10% increase in ridership and a 20% decrease in travel time for commuters.
- Conducted comprehensive traffic impact studies for three major development projects in New York City, providing detailed recommendations for mitigating potential transportation issues and ensuring a smooth integration of new developments into the existing transportation network.
