

# Johnay Edgeston

Front-End Developer

## Profile

I am a Front-End Developer with over 1 year of experience in developing web applications. I have a strong background in HTML, CSS, and JavaScript, which has enabled me to create visually appealing and interactive webpages. I have experience in developing user interfaces, creating responsive designs, and optimizing web experiences for different platforms. I have also worked with several frameworks such as Angular, React, and Vue. My expertise also expands to debugging, troubleshooting, and testing. I have a passion for learning new technologies and programming languages to stay ahead of the curve. I am a team player who values collaboration and communication.

## Employment History

### Lead Front-End Developer at Switch, NV

Nov 2022 - Present

- Developed and maintained a highly efficient front-end web application for Switch, NV, resulting in a 15% increase in website traffic and a 10% reduction in customer complaints.
- Led the design and implementation of a new user interface for Switch, NV's online store, increasing sales by 20%.
- Utilized cutting-edge technologies to successfully upgrade the mobile version of Switch, NV's website, leading to a 40% increase in mobile usage.
- Created and maintained a series of automated tests for Switch, NV's website, reducing the amount of manual testing required and saving the company time and money.

### Senior Front-End Developer at Zappos, NV

Aug 2022 - Oct 2022

- Created a new shopping cart page for Zappos, resulting in an 8% increase in overall sales volume. Utilized React and JavaScript to build the page, which optimized page load time by 50%.
- Developed an interactive user experience for the Zappos mobile app, resulting in a 10% rise in customer engagement. Employed HTML5, CSS3, and JavaScript to create the app, which also included features such as push notifications and dynamic product recommendations.
- Rebuilt the Zappos website's search engine, making it more accurate and efficient. Implemented AngularJS and Node.js to develop the search engine, which cut search query time by 33%.
- Developed a new product details page for Zappos, resulting in a 20% jump in customer satisfaction. Utilized HTML, CSS, and JavaScript to construct the page, which also included a product reviews section and a live chat feature.
