

Tyisha Chery

Mobile Developer

Profile

As a Mobile Developer with over 1 year of experience, I have designed, developed and tested a range of mobile applications for different platforms, such as Android and iOS. I have created apps for a variety of clients and businesses, utilizing my expertise in software development and mobile technology. I have a deep understanding of the entire development lifecycle, from the initial concept to the final product. Additionally, I am well-versed in the software development process, including design, coding, debugging, testing, and integration. I am also experienced in using different mobile development tools, such as XCode and Android SDK. With my knowledge and experience, I am confident that I can be a valuable asset to any mobile development team.

Employment History

Lead Mobile Developer at MetroNet, AR

Jan 2023 - Present

- Developed a mobile application for MetroNet, AR, that enabled customers to pay their bills remotely. This resulted in an increase of 10% in customer satisfaction and a decrease of 5% in customer service costs.
- Spearheaded the implementation of a new system for tracking mobile usage, which improved the accuracy of usage data by 15%.
- Worked with the IT department to create a robust mobile security system, which decreased the risk of cyber-attacks by 20%.

Senior Mobile Developer at AT&T, AR

Aug 2022 - Dec 2022

- Developed an innovative mobile application for AT&T's AR customers that enabled a 15% increase in customer engagement. The application was built using the native iOS platform and was successfully launched in the App Store.
- Spearheaded the development of a cutting-edge mobile payment system that secured over \$1 million in revenue for AT&T. The system was built using the latest technology stack and was deployed in less than 3 months.
- Led the design and implementation of an interactive customer loyalty program for AT&T's AR customers. The program increased customer retention by 20%, resulting in a 10% increase in overall revenue.
