PROFILE

I am a Software Product Manager with over 3 years of experience in the software industry. I have a successful track record of creating and managing software products throughout their lifecycle, with a focus on driving product strategies, feature roadmaps, and user experience design. I have a strong background in project management, product development, and market analysis, which has enabled me to successfully manage multiple software products through their entire product life cycles. I have a proven ability to manage product roadmaps, coordinate product releases, prioritize features, and create product marketing plans. Additionally, I have a deep understanding of customer needs and the ability to identify and engage with potential target markets. I am passionate about creating great software products that users love and am confident in my ability to deliver results.

EMPLOYMENT HISTORY

- Senior Software Product Manager at Oracle, OR**
Jan 2023 - Present
