Richmond, VA

As a DevOps Technician with over 1 year of experience, I have a strong background in automation, application deployment, and system administration. I have experience in developing, implementing, and managing infrastructure solutions for cloud-based applications. My technical expertise includes scripting languages such as Bash and Python, as well as Amazon Web Services, Azure, Containerization, and Kubernetes. I have a proven track record of successful deployments and of troubleshooting and resolving complex technical issues. Additionally, I possess excellent communication and problem-solving skills, allowing me to collaborate effectively with other stakeholders. I am committed to delivering high-quality solutions in a timely manner.
