## SKILLS

Network Configuration

Troubleshooting

Security

Firewall Management

Network Monitoring

System Administration

Routing Protocols

## LANGUAGES

English

Russian

## HOBBIES

Programming

Network Security

Building Computers

## PROFILE

I am a Network Administrator with over 2 years of experience in designing, implementing, and maintaining networks to ensure optimal performance. I have extensive knowledge of routing and switching protocols, Windows and Linux systems, network security, and network management. I have a proven track record of successfully managing and troubleshooting complex network issues. My experience includes providing technical support for users, monitoring and analyzing network performance, and developing strategies for improving network performance. I am highly organized, detail-oriented and have excellent problem-solving skills. I am passionate about technology and enjoy working with both software and hardware to ensure networks are running smoothly.

## EMPLOYMENT HISTORY

### ● Network Administrator at Optiva IT Solutions, MN

Jan 2023 - Present

- Implemented a new network architecture that increased the speed of data transfer by 25%, which resulted in improved customer satisfaction.
- Developed and deployed a secure Wi-Fi network that reduced the risk of data breaches by 40%.
- Redesigned the existing network infrastructure to reduce downtime by 50%, resulting in a dramatic improvement in uptime for Optiva IT Solutions.

### ● Network Support Technician at Net Force Systems, MN

Sep 2021 - Nov 2022

- Restored network connectivity for over 500 devices within 24 hours: Restored network connectivity for 500+ devices at Net Force Systems, MN within 24 hours. Troubleshoot the issue, identified the cause of the issue, and implemented a comprehensive solution to get the systems back online in record time.
- Increased network speed by 20%: Increased overall network speed by 20% by optimizing existing network infrastructure and replacing outdated hardware. Analyzed network traffic and identified areas of inefficiency, resulting in an improved network experience for end users.
- Implemented secure remote access solution: Implemented a secure remote access solution for Net Force Systems, MN that enabled secure access to the network from outside the office. Configured and tested the solution, ensuring that all users had access to the resources they needed without compromising security.

## CERTIFICATES

### Cisco Certified Network Associate (CCNA)

Mar 2021

### CompTIA Network+ Certification

Sep 2019

## MEMBERSHIPS

Institute of Electrical and Electronics Engineers (IEEE)
