Anchorage, AK

Profile

I am a Software Integration Engineer with over 2 years of experience. I have an extensive background in creating, testing and maintaining software solutions. My expertise includes developing software requirements, coding, debugging and deploying software applications. I have a strong knowledge of software development tools and techniques, such as C++, Java, HTML, and JavaScript. I have a proven track record of success in the development and implementation of large-scale software projects. I am a highly organized individual with excellent problem-solving skills and the ability to coordinate multiple tasks in a timely manner. I am confident that my experience and skills make me an ideal candidate for any software integration role.
