PROFILE

I am an experienced Software Integration Manager with over 6 years of experience in managing software and hardware projects. I have a proven track record in driving successful project outcomes, leading cross-functional teams, and executing on integration plans. My experience includes working with multiple stakeholders, vendors, and internal teams to ensure successful software and hardware integration. I have a strong technical background in software development, as well as a deep understanding of the software and hardware integration process. I am highly organized and adept at forming relationships with stakeholders to ensure timely and cost-effective project completion.
