## PROFILE

A highly driven Product Development Manager with 5 years of experience in leading cross-functional teams and successfully delivering innovative products to market. Demonstrates exceptional project management, strategic thinking, and problem-solving skills, coupled with a strong understanding of industry trends and customer needs. Proven track record in enhancing product portfolios, streamlining development processes, and driving revenue growth. Adept at fostering collaborative relationships with internal and external stakeholders to ensure optimal product performance and market success.

## EMPLOYMENT HISTORY

### ● Product Development Manager at Tyson Foods, AR

Mar 2023 - Present

- Developed and launched a new line of plant-based products, generating over \$5 million in revenue within the first year and expanding Tyson Foods' market share in the alternative protein category by 10%.
- Successfully managed a cross-functional team of 15 members in the development of innovative packaging solutions, resulting in a 20% reduction in material costs and a 15% decrease in overall packaging waste.
- Led the implementation of a streamlined product development process, reducing time-to-market by 25% and increasing overall efficiency in bringing new products to market.
- Collaborated with the marketing team to execute a product relaunch campaign that increased sales by 30% and improved brand perception among key customer demographics.

### ● Associate Product Development Manager at Walmart, AR

Jul 2018 - Jan 2023

- Successfully led a team of 5 to develop and launch a new product line in the electronics department, resulting in a 25% increase in sales and a 15% increase in customer satisfaction ratings within the first six months.
- Streamlined the product development process by implementing a new project management system, reducing the average product development cycle time by 30% and saving the company \$1.2 million in annual operating costs.
- Collaborated with cross-functional teams to redesign the packaging for a popular grocery item, leading to a 50% reduction in packaging materials, a 10% decrease in shipping costs, and a 20% increase in sales within the first year.
