Profile

Dedicated Public Health Nurse with 1 year of experience in providing community-based healthcare services, promoting health education, and implementing disease prevention strategies. Proficient in developing and conducting health assessments, collaborating with multidisciplinary teams, and advocating for patients' needs. Demonstrates strong clinical skills, cultural competence, and a commitment to improving public health outcomes. Continuously seeking opportunities to expand knowledge and enhance professional growth in the public health nursing field.

Employment History

Public Health Nurse at Colorado Department of Public Health and Environment, CO

Mar 2023 - Present

- Led a successful vaccination campaign that increased immunization rates by 25% among children aged 0-6 in Colorado, resulting in a significant decrease in vaccine-preventable diseases and contributing to overall community health.
- Developed and implemented a comprehensive public health education program that reached over 10,000 individuals in Colorado, leading to a 15% increase in knowledge and awareness about critical health issues such as obesity, mental health, and substance abuse.
- Collaborated with local health departments and community organizations to establish a network of 50 free clinics across Colorado, providing essential healthcare services to over 20,000 underserved residents and reducing emergency room visits by 18%.
- Conducted an extensive epidemiological investigation during a major foodborne illness outbreak, identifying the source and implementing prevention measures that resulted in a 40% reduction in related hospitalizations and a swift resolution of the crisis.

Public Health Nurse I at Tri-County Health Department, CO

Sep 2022 - Jan 2023

- Successfully managed a vaccination drive, administering over 5,000 vaccines to residents across the three counties, contributing to a 20% increase in overall immunization rates within six months.
- Developed and implemented a community health education program that reached over 10,000 residents, resulting in a 15% reduction in obesity rates and a 10% decrease in smoking prevalence within one year.
- Conducted disease surveillance and outbreak investigations, identifying and controlling over 50 cases of communicable diseases, thereby preventing further spread and reducing the risk of potential epidemics.
- Spearheaded a maternal and child health initiative, providing prenatal and postnatal care to over 1,500 women and their newborns, which contributed to a 25% decrease in infant mortality rates and a 30% increase in breastfeeding rates within two years.
