EMPLOYMENT HISTORY

Radiologist at Advanced Radiology Services, PA

Mar 2023 - Present

- Successfully diagnosed over 1,500 complex cases annually, resulting in accurate and timely treatment plans for patients and contributing to a 95% patient satisfaction rate at Advanced Radiology Services, PA.
- Implemented a new digital imaging system, streamlining the diagnostic process and reducing report turnaround time by 30%, which ultimately led to improved patient care and increased efficiency within the practice.
- Conducted over 100 educational presentations and training sessions for both medical professionals and patients, enhancing the understanding of radiology procedures and fostering a collaborative work environment.
- Collaborated with a team of radiologists to publish five research articles in renowned medical journals, contributing to advancements in the field of radiology and solidifying Advanced Radiology Services, PA's reputation as a leading provider of radiological services.

Radiology Technologist at Main Line Diagnostic Imaging, PA

Jul 2021 - Jan 2023

- Successfully increased patient throughput by 20% by implementing new imaging techniques and optimizing scheduling procedures, resulting in improved efficiency and patient satisfaction at Main Line Diagnostic Imaging, PA.
- Streamlined the diagnostic imaging process by collaborating with a team of radiologists and technologists to reduce report turnaround time by 30%, leading to quicker diagnoses and treatment plans for patients.
- Led a quality improvement initiative that resulted in a 15% reduction in repeat imaging exams, saving the facility an estimated \$50,000 annually in operational costs and minimizing patient exposure to unnecessary radiation.

Radiology Assistant at Penn Radiology, PA

Aug 2017 - May 2021

- Successfully increased patient throughput by 20% through the implementation of efficient scheduling and workflow optimization techniques, resulting in improved patient satisfaction at Penn Radiology.
- Streamlined the image archiving process by implementing a new digital storage system, reducing retrieval time by 30% and enhancing collaboration between radiologists and referring physicians.
