## Profile

A dedicated and skilled Registered Respiratory Therapist with 2 years of experience in providing exceptional patient care and support in various healthcare settings. Proficient in administering respiratory treatments, conducting patient assessments, and collaborating with multidisciplinary teams to develop and implement individualized care plans. Committed to staying current with the latest advancements in respiratory therapy and consistently demonstrating a strong work ethic, excellent communication skills, and a passion for improving patient outcomes.

## Employment History

### Registered Respiratory Therapist at Respiratory Therapists R Us, FL

May 2023 - Present

- Successfully managed the respiratory care of over 500 critically ill patients in the ICU, resulting in a 95% recovery rate and significantly reducing hospital readmissions.
- Spearheaded the implementation of a new ventilator management protocol at Respiratory Therapists R Us, FL, which led to a 30% reduction in ventilator-associated pneumonia cases and improved overall patient outcomes.
- Trained and mentored 20 new Registered Respiratory Therapists, contributing to a 90% staff retention rate and consistently maintaining high-quality patient care standards within the facility.

### Respiratory Therapist I at Sunshine State Respiratory Care, FL

Jul 2021 - Apr 2023

- Successfully managed the care of over 150 critically ill patients in the Intensive Care Unit, ensuring proper ventilation and timely interventions to optimize their respiratory function.
- Implemented a new patient education program for individuals with chronic lung diseases, resulting in a 20% improvement in patient adherence to treatment plans and a 15% reduction in hospital readmissions.
- Trained and supervised a team of 10 new respiratory therapists, improving the department's overall efficiency and patient care quality by 25%.
- Collaborated with multidisciplinary teams to develop and implement an innovative weaning protocol for mechanically ventilated patients, reducing average ventilator days by 30% and significantly decreasing complications related to prolonged mechanical ventilation.
