Profile

A dynamic and strategic Research Director with a decade of experience in driving research excellence and innovation across diverse industries. Possesses a proven track record of designing and executing complex research projects, managing cross-functional teams, and delivering actionable insights to drive business growth. Skilled in leveraging data-driven methodologies, fostering collaborations, and securing funding to propel organizational success. Adept at translating research findings into actionable strategies, enhancing stakeholder engagement, and staying abreast of industry trends to maintain a competitive edge.

Employment History

Research Director at Granite State Management & Research, NH

Feb 2023 - Present

- Successfully secured \$5 million in research funding, leading to the establishment of three new research programs focused on education policy, workforce development, and financial management.
- Developed and implemented a comprehensive research strategy that resulted in a 25% increase in research output, including 15 peer-reviewed publications and 30 conference presentations in one year.
- Led a team of 10 researchers and analysts in conducting a statewide assessment of educational programs, resulting in data-driven recommendations adopted by the New Hampshire Department of Education to improve student outcomes.
- Established key partnerships with industry leaders and academic institutions, resulting in increased collaboration and access to cutting-edge resources, contributing to a 20% growth in the organization's research capabilities.

Senior Research Manager at New England Research Institutes, NH

Aug 2018 - Jan 2023

- Successfully managed a team of 20 researchers and coordinated with external partners, leading to the completion of 5 major research projects within allocated budgets and timelines, resulting in a 25% increase in the institute's research output.
- Developed and implemented innovative data analysis methods that improved the efficiency of the research process by 30%, leading to cost savings of \$500,000 and enabling the allocation of resources to new initiatives.
- Secured over \$2 million in grant funding to support the institute's research endeavors, contributing to a 40% growth in the organization's research portfolio and providing opportunities for collaboration with prestigious institutions.

Research Manager at New Hampshire Neurological Institute, NH

Aug 2013 - Jul 2018

- Successfully managed a research project on neurodegenerative diseases, resulting in the identification of two novel therapeutic targets for Alzheimer's and Parkinson's diseases, which led to a 30% increase in funding for further research.
