Detail-oriented Revenue Cycle Analyst with 1 year of experience in optimizing revenue processes and streamlining financial operations. Proficient in data analysis, reporting, and identifying areas for improvement. Demonstrated ability to collaborate effectively with cross-functional teams and implement solutions to increase efficiency and profitability. Strong analytical, problem-solving, and communication skills contribute to success in managing revenue cycles and driving organizational growth.

Revenue Cycle Analyst at Med-Metrix, NJ

May 2023 - Present

- Successfully reduced outstanding account receivables by 30% within a 6-month period, resulting in increased cash flow for Med-Metrix and improved financial stability for the organization.
- Conducted a thorough analysis of revenue cycle processes and identified areas of improvement, leading to a 20% increase in clean claim submission rates and a reduction in claim denials by 15% over the course of one year.
- Streamlined communication between billing and coding departments, resulting in a 25% decrease in coding errors and a 10% reduction in time spent on claim resubmissions.
- Played a key role in implementing a new Electronic Health Record (EHR) system, which contributed to a 40% increase in overall efficiency and a 50% reduction in manual data entry errors in the revenue cycle process.

Associate Revenue Cycle Analyst at Ensemble Health Partners, NJ

Sep 2022 - Apr 2023

- Successfully reduced claim denials by 15% within a year through meticulous analysis of denial trends and implementing process improvements, resulting in increased revenue for Ensemble Health Partners, NJ.
- Streamlined the revenue cycle process by identifying and eliminating bottlenecks, leading to a 10% reduction in A/R days and a 5% increase in cash collections within six months.
- Spearheaded a cross-departmental team to develop and implement a new patient billing system, which improved patient satisfaction scores by 20% and decreased billing errors by 25% in the first year.
- Conducted extensive data analysis to identify underperforming areas within the revenue cycle, resulting in the implementation of targeted strategies that led to a 12% overall increase in net revenue within 18 months.
