Profile

SAP Manager with 5 years of experience in overseeing and executing end-to-end SAP implementations, managing cross-functional teams, and driving process improvements. Adept at identifying and resolving technical issues, optimizing system performance, and ensuring seamless integration with business processes. Proven track record of delivering projects on time and within budget while maintaining the highest level of client satisfaction.

Employment History

SAP Manager at SAP America Inc., MA

Mar 2023 - Present

- Successfully led a team of 10 SAP consultants to complete a complex ERP implementation project for a major client, achieving a 15% increase in overall process efficiency and resulting in \$2 million annual cost savings for the client.
- Streamlined the SAP system landscape for a large manufacturing company, consolidating 5 disparate systems into a single integrated solution, which reduced system maintenance costs by 30% and improved data accuracy by 25%.
- Oversaw a company-wide SAP S/4HANA migration project for a Fortune 500 client, completing the project on time and within budget, while achieving a 20% reduction in operational costs and a 35% improvement in reporting capabilities.
- Implemented an innovative SAP Fiori application for a retail client, improving their inventory management processes and leading to a 10% increase in sales due to better product availability and a 15% reduction in stockholding costs.

SAP Project Manager at Deloitte Consulting LLP, MA

Aug 2018 - Jan 2023

- Successfully led a team of 25 consultants in the implementation of SAP S/4HANA for a large retail client, resulting in a 20% increase in operational efficiency and a 15% reduction in inventory costs.
- Streamlined the project delivery process by introducing Agile methodologies to an SAP implementation project for a major pharmaceutical company, reducing the project timeline by 30% and saving the client \$2 million in costs.
- Oversaw the successful migration of a global manufacturing company's SAP system to the cloud, reducing infrastructure costs by 40% and improving system performance by 25%.
