PROFILE

A results-driven Senior Manager with 5 years of progressive experience in driving operational efficiency, strategic planning, and team leadership. Adept at fostering a collaborative work environment and implementing innovative solutions to optimize performance, reduce costs and improve overall profitability. Proficient in project management, data analysis, and risk mitigation, with a proven track record of successfully leading cross-functional teams to achieve organizational goals. Demonstrates exceptional communication and interpersonal skills, with an unwavering commitment to achieving excellence in all areas of business operations.

EMPLOYMENT HISTORY

● Senior Software Engineering Manager at Boston Consulting Group, MA

May 2023 - Present

- Led a team of 15 software engineers to develop and launch a new enterprise software solution for a major client, resulting in a 25% increase in the client's operational efficiency and generating \$2 million in annual revenue.
- Reduced the software development cycle time by 30% through the implementation of Agile methodologies and continuous integration practices, improving the overall productivity of the engineering team and accelerating time-to-market for new product releases.
- Spearheaded the migration of legacy systems to a cloud-based infrastructure, reducing operational costs by 40% and improving system scalability and reliability to support the company's rapid business growth.
- Successfully managed a cross-functional team in the design and implementation of a cybersecurity program that reduced security incidents by 70%, ensuring compliance with industry regulations and protecting sensitive client data.

● Director of Software Engineering at Raytheon Technologies, MA

Jul 2018 - Mar 2023

- Led the development and implementation of a large-scale cybersecurity software project, resulting in a 45% increase in threat detection and prevention for Raytheon Technologies' clients.
- Oversaw the successful integration of a new agile development methodology, leading to a 30% improvement in product delivery time and a 20% increase in overall team productivity.
- Managed a cross-functional team of 50+ engineers and developers, driving the completion of several high-priority projects on time and under budget, saving the company over \$2 million in potential costs.
