PROFILE

Senior Oracle Developer with 5 years of experience in designing, developing, and implementing Oracle-based solutions. Proficient in SQL, PL/SQL, Oracle Forms, and performance tuning, with a strong background in database management and data integration. Proven ability to deliver high-quality, scalable solutions while meeting tight deadlines and effectively collaborating with cross-functional teams. Demonstrated success in driving process improvements and optimizing system performance for diverse industries.

EMPLOYMENT HISTORY

● Senior Oracle Developer at Cognizant Technology Solutions, KY

Feb 2023 - Present

- Implemented a streamlined database management system for a major client, resulting in a 35% reduction in query processing time and a 20% increase in overall system performance.
- Developed and optimized complex PL/SQL procedures and functions for a high-profile financial project, leading to a 25% improvement in data processing efficiency and enabling the client to generate reports 50% faster.
- Successfully migrated a critical business application from Oracle 11g to 12c, ensuring seamless integration and minimizing downtime to less than 3 hours, which led to a 15% increase in application performance.
- Led a team of junior Oracle developers in delivering a robust, scalable data warehousing solution for a large healthcare client, which improved data analysis capabilities by 30% and reduced data storage costs by 20%.

● Oracle Developer II at Humana, KY

Jul 2018 - Jan 2023

- Developed and implemented a database optimization strategy that improved query response times by 25%, resulting in increased efficiency for over 500 end-users across the organization.
- Successfully migrated 20 legacy applications to Oracle's latest platform, reducing maintenance costs by 15% and improving overall application performance by 30%.
- Designed and delivered a custom reporting solution for the finance department, automating the generation of over 100 monthly reports and reducing manual effort by 50 hours per month.
