

Shena Brizzee

Sewing Machine Operator

Profile

Results-driven Sewing Machine Operator with 1 year of experience in the textile industry. Skilled in operating and maintaining a wide range of sewing machines, ensuring high-quality stitching and timely completion of projects. Proficient in reading and interpreting patterns and blueprints, with a strong focus on attention to detail and maintaining a safe working environment. Demonstrates excellent communication and teamwork abilities, contributing to efficient production workflows and overall customer satisfaction.

Employment History

Sewing Machine Operator at Sewing Technologies Corporation, MN

Feb 2023 - Present

- Successfully operated a range of sewing machines, including single and double needle machines, to produce over 10,000 high-quality garments for major clients within one year, ensuring timely delivery and exceeding customer expectations.
- Improved overall production efficiency by 15% through identifying and addressing bottlenecks in the sewing process, resulting in increased output and reduced lead times for customer orders.
- Trained and mentored four new Sewing Machine Operators, sharing knowledge and best practices to help them quickly become productive members of the team, contributing to an overall increase in productivity by 10%.
- Implemented strict quality control measures, reducing defects in finished garments by 20%, leading to a significant decrease in customer returns and an increase in client satisfaction.

Assistant Sewing Machine Operator at Tailor Made Inc., MN

Sep 2022 - Dec 2022

- Successfully completed a high volume of 350 garments per day, exceeding the company's target by 10% and contributing to a 15% increase in overall productivity at Tailor Made Inc., MN.
- Streamlined the sewing process by identifying and implementing a new organizational system for tools and materials, resulting in a 25% reduction in setup time and a 5% increase in daily output.
- Assisted in training and mentoring four new Sewing Machine Operators, helping them achieve a 90% efficiency rate within their first month of employment, leading to a 7% increase in team productivity.
- Collaborated with the quality control team to reduce defects and rework by 30%, ensuring that 95% of garments met strict quality standards and contributing to increased customer satisfaction.

Education

Diploma in Textile and Apparel Production at University of Minnesota, Twin Cities, MN

Sep 2017 - May 2022
