PROFILE

Results-driven SOA Architect with 5 years of experience in designing, implementing, and managing Service Oriented Architecture solutions for complex business processes. Adept at collaborating with cross-functional teams and integrating applications using SOA principles to optimize performance and scalability. Demonstrated success in leveraging ESB, web services, and API management to streamline enterprise workflows and enhance user experience. Strong problem-solving, communication, and leadership skills with a track record of driving innovation and delivering valuable business outcomes.

EMPLOYMENT HISTORY

SOA Architect at Windstream Communications, AR

Mar 2023 - Present

- Led the successful integration of 15+ enterprise applications through the implementation of SOA architecture, resulting in a 30% improvement in system efficiency and reducing maintenance costs by 20% at Windstream Communications, AR.
- Designed and developed a scalable SOA governance model that streamlined processes and improved service reusability by 25%, leading to a 15% reduction in software development time and costs.
- Spearheaded the migration of legacy systems to an SOA-based infrastructure, consolidating multiple platforms and improving system interoperability by 40%, ultimately increasing overall business agility and reducing operational costs by 10%.
- Played a key role in the establishment of a Center of Excellence for SOA, providing training and mentorship to over 50 team members, leading to a 35% increase in the adoption of SOA best practices and a 20% improvement in overall team efficiency.

Associate SOA Architect at Arkansas Blue Cross and Blue Shield, AR

Sep 2018 - Feb 2023

- Successfully designed and implemented a new service-oriented architecture (SOA) system for Arkansas Blue Cross and Blue Shield, reducing system integration costs by 20% and improving overall efficiency by 15%.
- Developed a comprehensive SOA governance framework that streamlined decision-making processes, reduced project delivery time by 25%, and increased collaboration among cross-functional teams.
- Led a team of developers in the migration of legacy applications to the new SOA platform, resulting in a 30% reduction in maintenance costs and a 40% improvement in system performance.
- Conducted regular training sessions and workshops for over 50 IT professionals, enhancing their understanding of SOA principles and best practices, and increasing overall productivity by 10%.
