Profile

Dedicated SQL Server DBA with 1 year of experience managing and optimizing databases. Skilled in database administration, performance tuning, and troubleshooting. Demonstrated ability to implement database backup and recovery strategies, ensuring data integrity and availability. Quick learner with a strong foundation in SQL, eager to contribute to the success of a dynamic team.

Employment History

SQL Server DBA at DBA North Dakota, ND

May 2023 - Present

- Reduced server downtime by 30% through optimizing maintenance processes and implementing efficient backup strategies, resulting in increased productivity and cost savings for the company.
- Improved database performance by 25% by conducting thorough analysis and tuning of SQL queries, indexes, and stored procedures, leading to faster response times and better user experience.
- Successfully migrated 50+ databases to a new SQL Server version with minimal disruption to daily operations, ensuring seamless transition and compliance with the latest industry standards.

Junior SQL Server DBA at SQL Solutions Group, ND

Aug 2022 - Mar 2023

- Successfully optimized 15 complex SQL queries, resulting in a 30% reduction in average execution time and improving overall system performance.
- Implemented a comprehensive database backup strategy, reducing data loss risk and ensuring 99% data recovery in case of system failures.
- Streamlined the database indexing process, leading to a 20% improvement in query response time and enhancing user experience.
- Conducted thorough performance tuning for 50+ SQL Server instances, identifying and resolving bottlenecks, and achieving a 25% increase in overall system efficiency.
