HOBBIES

PROFILE

TIBCO Developer with 1 year of experience in designing, developing, and implementing TIBCO integration solutions. Proficient in TIBCO BusinessWorks, EMS, and ActiveMatrix BPM, with a strong understanding of Java, XML, and web services. Demonstrated ability to quickly learn new technologies, troubleshoot issues, and provide innovative solutions to enhance system performance and functionality. Excellent communication and teamwork skills, with a strong commitment to delivering high-quality results on time and within budget.

EMPLOYMENT HISTORY

● TIBCO Developer at TIBCO Software Inc., AR

Mar 2023 - Present

- Implemented a large-scale TIBCO integration project for a Fortune 500 company, resulting in a 20% increase in operational efficiency and saving the client over $5 million in annual operating costs.
- Developed a custom TIBCO solution for a major healthcare provider, automating their patient data management system and reducing manual data entry errors by 30%, which led to improved patient care and satisfaction.
- Successfully migrated a legacy system to TIBCO for a global financial institution, streamlining their data processing capabilities and enabling them to process 50% more transactions per day without any additional resource investments.

● Associate TIBCO Developer at Arkansas Blue Cross and Blue Shield, AR

Sep 2022 - Feb 2023

- Successfully integrated TIBCO applications with 5 major healthcare systems, resulting in a 20% improvement in data processing efficiency and reducing manual intervention by 30%.
- Developed and maintained 3 high-priority TIBCO projects for Arkansas Blue Cross and Blue Shield, leading to a 15% increase in overall system performance and reducing downtime by 10%.
- Streamlined the deployment process for TIBCO applications by implementing a continuous integration pipeline, reducing deployment time by 25% and increasing the frequency of releases by 40%.
- Collaborated with a team of 6 developers to design and implement a scalable TIBCO solution for handling 1 million daily transactions, resulting in a 50% reduction in system response time and increasing customer satisfaction by 20%.
